Dear Senator:

On behalf of the values of the Founding Fathers who founded his great nation, the United States of America, I ask humbly, as a world citizen of an allied country, not let intimidated by the populist speeches about the need for a "State global security" or about the need of total control, reminiscent dystopias that you and your great nation have fought throughout history.

The best US values such as respect for freedom, privacy, privacy of citizens from the encroachments of the most powerful institution in the world or its agencies, the Federal Government, also in the field of the so-called new technologies, get stop the injustice of not civilized world not through laws that allow their agencies like the NSA, to control us all and spy worldwide, but through a fair and multilateral cooperation, based on the moral superiority of the Western world.

Yours faithfully,
